# BREAS MARKETING BULLETIN

## Z1® CPAP, Z1® Auto enhancements

---

We are pleased to introduce further enhancements for the Z1® portable CPAP and APAP devices.

The changes are the following.

- **Top end-cap with 70% of the holes closed, air inlet tube and blower.**

To integrate the last model of the blower, the air inlet tube and the top end-cap are redesigned to keep similar performances of the Z1 with improvement of the dynamic pressure stability and the static acoustic noise.

We thank you for using the Z1®. For further questions, please contact your local Breas representative or Breas Technical Support at [techsupport@breas.com](mailto:techsupport@breas.com).
