

# BOMT Hospital NIV Mask

Maximum comfort with reliable sealing

A high quality single patient interface for the Hospital

BOMT NIV mask range offers a quick and reliable seal without compromising on patients' comfort while using it with CPAP / APAP / Bi-Level (NIV) / Ventilators. It is quickly accepted by user.

## Easy to Select and Use

BOMT Masks are colour coded and easily identifiable and designed to fit with any patient circuit used in the hospitals. The head gear is having three point connection for easy to fit and ensure best sealing.

## Reliable Seal

The cushion and head gears are designed to fit on any type of face without need of forehead support. It helps to reduce pressure, minimize leak, enhance comfort and improves stability while use.

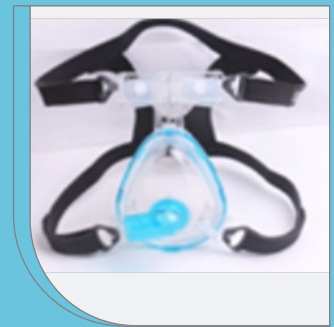

## Wider choices of Type and Sizes

Wider range of sizes like small, medium and large in Vented and Non Vented types gives the user a best choice depending on the requirement. It leads to better therapy adherence and gives more time to clinical to focus on care where its desired the most.

## Light weight BOMT NIV Mask features:

- ▷ A soft supply dual wall cushion with exact fit
- ▷ Built-in Oxygen Port
- ▷ Quick release head gear for easy removal
- ▷ Diffuse exhalation system
- ▷ Colour coded
- ▷ Swivelling elbow
- ▷ Available in Vented & Non-Vented types in colour codes
- ▷ Three available sizes Large, Medium & Small
